

# Hobbies & Interests

Kitchen renovation where I built all the drawers, drawer front, and re-used many of the old cabinets.

One of my many time-lapses and photographs of friends, family, and nature.

Wooden chain carved from a single 4x4 piece of mahogany. Tools used: drill, dremel, hand files.

Lamp with dimmer turned from laminated plywood and finished with wax

Power tool dragster designed and built for the first and only Sacramento power tool dragster competition. Two angle grinders, spur gear powertrain, and saw blade rear wheels

My entry into a woodturning competition. The challenge was to turn as many nesting eggs that fit inside the size of a normal egg.
